# Job Well Done!

---

Round of Applause!

# Major Discussion Points

---

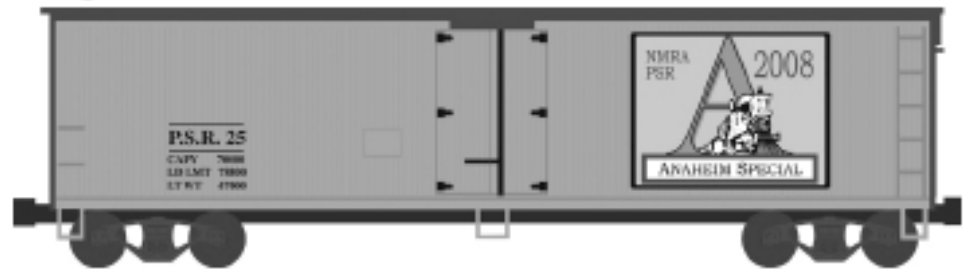

- What went right?
- What went wrong?
- Lessons learned?
- Ready for 2011?
- Pre-planning for NMRA 2011 Sacramento.

# BayLTC Orange Reefer Car

- 17 or more Orange Reefers – Convention Cars
  - Brian & Mathew supplied prototypes; Brian & Bill created instructions.
  - Detailed display car vs mass produced souvenir car; Jake's book.
  - Loren and Bruce built icing platforms. I built a citrus packing house.
  - Paul to create graphics.
  - Give a set of instructions and graphics to each participating club and select individuals? (free)

## Convention Car

Oranges were a durable fruit that could be shipped across the United States by train. A vigorous marketing campaign soon convinced every household that they wanted the healthful California sunshine captured in the orange. With this success, the California Fruit Growers Association used fleets of railroad refrigerator cars for shipping oranges and other more perishable fruit from California. Thus, our convention car celebrates this history with a brightly orange-colored wooden reefer.

*Artists rendition -- actual car may differ.*
